

Stakeholder Consultation on Monitoring Framework for SDG Goal 13 (Climate Change):

Background: Madhya Pradesh is the second largest state of India comprising of 52 districts spread across 11 agro-climatic zones. In 2011, the total population of the state was 72.6 million with 72.3% being rural. The rural population heavily relies on primary sectors like agriculture, horticulture, fishery, livestock, poultry and forestry for livelihood. Due to climate change, these natural resource-based livelihood sources are expected to be impacted more than the other sectors.

Purpose: The project aims to track progress in implementation of adaptation interventions/ strategies, as per the Madhya Pradesh State Action Plan on Climate Change (SAPCC) and/ or how these interventions are reducing vulnerability, improving adaptive capacity, and supporting the overall well-being of communities affected by the impacts of climate change.

Participants: State Knowledge Management Centre on Climate Change, EPCO, Govt. of Madhya Pradesh with the participation of all departments as per the State Action Plan on Climate Change.

Expected Outcomes: The activity will pave way for a half day stakeholder consultation to discuss on monitoring framework for monitoring the progress in Madhya Pradesh on implementation of SDG goal 13 - Climate Actions. The Consultation will lead to generation of inputs for monitoring framework in the form of consultation report.
